

MAKE YOUR PHOTOS

# POP

## Zoom with your feet

Get closer to your subject instead of zooming on your phone.

## Take candid photos

Try to get students in action more often than posed, smiling at the camera. It's OK to ask them to focus on work.

## Landscape FTW

When taking pictures and video, hold your phone sideways (Landscape) for the most versatile pictures

## Know your settings

Your phone's camera has powerful settings for lighting, focus, & depth of field.
